SUMMARY

Computer Engineering student passionate about Artificial Intelligence and Applied AI. Actively learning and building projects involving machine learning, large language models, and AI-driven applications. Eager to apply software engineering principles to create innovative solutions while continuously expanding technical expertise in modern AI technologies.

EDUCATION

Bachelor of Science (B.Sc.) in Computer Engineering
Ostim Technical University 📍

09/2024 – Present
Ankara, Turkey

SKILLS

Programming Languages

Python, C, C++

Data Science & AI/ML

NumPy, Pandas, scikit-learn, PyTorch, TensorFlow

Generative AI / LLM Development

OpenAI API, LangChain, RAG, Prompt Engineering

Web Development

React, Next.js, Tailwind CSS, Node.js

Backend & API Development

FastAPI, Flask, REST APIs, Postman

Databases

PostgreSQL, MySQL, SQLite

LANGUAGES

- English
- German
- Turkish

COURSES

Kaggle Python 📍

Kaggle Pandas 📍

Kaggle Data Visualization 📍

Kaggle ML 📍

Kaggle SQL 📍

Google & Kaggle – 5-Day AI Agents Intensive Course (In Progress)

Focused on AI agents, LLM-powered applications, agent workflows, tool usage, and practical AI system development.

PROJECTS

Scenté® — Fine Fragrance E-Commerce Website 📍

Built a full-featured perfume e-commerce platform with shopping cart, user accounts, wishlist management, checkout flow, product comparison, and an AI-powered customer assistant. Developed entirely with vanilla JavaScript and browser-based storage (localStorage), focusing on responsive design, interactive user experience, and scalable front-end architecture.

Academic Assistant & Exam Planner 📍

Developed a web application for computer engineering students to track study progress and manage exam preparation. Implemented real-time exam countdowns, task planning features, and interactive performance analytics using Chart.js. Designed a modern user interface with dark mode, glassmorphism effects, and responsive layouts while building the backend with Django and Python.
